The Corporation's significant accounting policies are summarized in detail in note 3 of the Corporation's financial statements for the year ended December 31, 2023 and are available on www.sedar.com.

Nature and Description of the Business

Seven Oaks Capital Corp. was incorporated under the *Business Corporations Act (Ontario)* on February 19, 2021 and is classified as a Capital Pool Company as defined in TSX Venture Exchange (the "Exchange") Policy 2.4. The Corporation has not commenced commercial operations and has no significant assets other than cash. The Corporation will not carry on any business other than the identification and evaluation of assets or businesses with a view to completing a Qualifying Transaction, as defined in Exchange Policy 2.4., except as described in the Corporation's prospectus dated March 11, 2022.

On April 5, 2022, the Corporation completed its Initial Public Offering ("IPO") of 3,500,000 common shares at a price of \$0.10 per share for gross proceeds of \$350,000. Canaccord Genuity Corp. acted as lead agent for the offering, in connection with which it received a cash commission equal to 10% of gross proceeds and options to purchase up to 350,000 Common Shares at an exercise price of \$0.10 per Common Share, exercisable within sixty months from the date of listing of the Common Shares on the Exchange. The Corporation also paid a corporate finance fee and reimbursed the Agent for legal fees and other reasonable expenses incurred pursuant to the IPO. The common shares of Seven Oaks commenced trading on the TSX Venture Exchange on April 5, 2022 under the symbol "SEVN.P".

On January 29, 2023, 150,000 stock options were granted to a director of the Corporation, at a price of \$0.10 per share. The stock options have an expiry date of five years from the date of grant and vested immediately. The stock options were valued at \$10,369 using the Black-Scholes option pricing model based on the following assumptions: expected volatility of 86.89%, expected life of five years, expected dividend yield of 0%, risk-free rate of 2.77% and a share/exercise price of \$.10.

On January 29, 2023 the Company cancelled vested options to purchase 150,000 common shares in the capital of the Corporation, 50,000 of which were issued to a director of the Corporation, at a price of \$0.10 per share on November 12, 2021, and 100,000 of which were granted on August 10, 2022, at a price of \$.10 per share.

On November 10, 2023, the annual general and special meeting of the shareholders of the Corporation was held with shareholders of the Corporation voting in favour of resolutions re-electing the board of directors, appointing the auditor, and re-approving the stock option plan.

The Corporation's financial statements have been prepared in accordance with IFRS applicable to a going concern, which contemplates that the Corporation will be able to realize its assets and discharge its liabilities in the normal course of business. The Corporation has no source of operating revenues and its ability to operate as a going concern in the near-term will depend on its ability to successfully identify and complete a Qualifying Transaction, which may require the raising of additional financing in the future. The Corporation's financial statements do not purport to give effect to adjustments, if any, that may be necessary should the Corporation be unable to continue and therefore, be required to realize its assets and discharge its liabilities in a manner other than in the ordinary course of business.

The proceeds raised from the issuance of share capital may only be used to identify and evaluate assets or businesses for future investment, with the exception that up to \$3,000 per month may be used for reasonable general and administrative expenses of the Corporation. These restrictions apply until completion of a Qualifying Transaction by the Corporation as defined under the policies of the Exchange Policy 2.4. The head office and the registered head office of the Corporation is located at 8 King Street East, suite 1712, Toronto, Ontario, M5C 1B5.

Transactions with Related Parties

All transactions with related parties occurred in the normal course of operations. The Corporation's related party transactions are as follows:

Key management personnel are those individuals having responsibility for planning, directing, and controlling the activities of the Corporation. The Corporation considers the officers and directors to be key management. During the three month period ended March 31, 2024, the Corporation incurred share-based compensation of \$nil (2023 - \$10,369) through options issuance. Such options were fair valued based on the Black-Scholes option pricing model.

Investor Relations

During the three-month period ended March 31, 2024, the Corporation's management handled the Corporation's investor relations activities.

Financial Instruments and Risk Management

The carrying values of cash and accounts payable and accrued liabilities approximate fair value due to the relatively short-term maturities of these instruments.

The Corporation's activities may expose it to a variety of financial risks: fair values, credit risk, liquidity risk and market risk (including interest rate risk). The Board of Directors provides regular

guidance for overall risk management.

Management of Capital

The Corporation's objective when managing capital is to maintain its ability to continue as a going concern to provide returns for shareholders and benefits for other stakeholders.

The Corporation includes equity, comprised of issued common shares and accumulated deficit, in the definition of capital. The Corporation's primary objective with respect to its capital management is to ensure that it has sufficient cash resources to fund the identification and evaluation of potential acquisition targets. The Corporation may attempt to raise additional funds through the issuance of equity or by securing strategic partners to secure additional capital to pursue these plans. The proceeds raised from the issuance of common shares may only be used to identify and evaluate assets or businesses with a view to completing a Qualifying Transaction. These restrictions apply until completion of a Qualifying Transaction by the Corporation as defined under the Exchange policy 2.4.

Future Change in Accounting Policies

Refer to Note 3 in the Notes to the Financial Statements as at and for the year ended December 31, 2023 for details of the Corporation's significant accounting policies.

Contingency

There is no assurance that the Corporation will identify a business or asset that warrants acquisition or participation at which time the Exchange may suspend or de-list the Corporation's shares from trading.

Risk Disclosures and Fair Value

As at March 31, 2024, the Corporation's financial instruments consist of cash, accounts payable and accrued liabilities. The fair values of these financial instruments approximate their carrying values due to the relatively short-term maturity of these instruments.

The Corporation is exposed in varying degrees to a number of risks arising from financial instruments. Management's involvement in the operations allows for the identification of risks and variances from expectations. The Corporation does not participate in the use of financial instruments to mitigate these risks. The Board approves the risk management processes. The Board's main objectives for managing risks are to ensure liquidity, the fulfillment of obligations, the Corporation's search for a Qualifying Transaction, and to limit exposure to credit and market risks.

Credit risk

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial instrument fails to meet its obligations. The Corporation is exposed to credit risk through

its cash balance which is held at a Canadian financial institution. The Corporation believes its exposure to credit risk is not significant.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Management believes the Corporation had no significant exposure to interest rate risk through its financial instruments as at March 31, 2024.

Liquidity risk

Liquidity risk is the risk that the Corporation will not be able to meet its obligations associated with financial liabilities. The Corporation has a planning and budgeting process in place by which it anticipates and determines the funds required to support normal operation requirements. The Corporation coordinates this planning and budgeting process with its financing activities through the capital management process described in the section entitled “Management of Capital”, in normal circumstances. The Corporation’s accounts payable and accrued liabilities have contractual maturities of less than 30 days and have normal trade terms.

Risks and Uncertainties

The Corporation does not have a history of operations. There is no assurance that it will produce revenue, operate profitably or provide a return on investment in the future.

The Corporation’s continued operation will be dependent upon its ability to complete a Qualifying Transaction and to generate operating revenues and to procure additional financing. To date, the Corporation has done so through equity financing.

The Corporation has no active business or assets other than cash. It does not have a history of earnings, nor has it paid any dividends. It will not generate earnings or pay dividends until at least after the completion of the proposed Qualifying Transaction.

The directors and officers of the Corporation will only devote a small portion of their time to the business and affairs of the Corporation. Some of them are or will be engaged in other projects or businesses such that conflicts of interest may arise from time to time.

The Corporation is relying solely on the past business success of its directors and officers to identify a Qualifying Transaction of merit. The success of the Corporation is dependent upon the efforts and abilities of its management team. The loss of any member of the management team could have a material adverse effect upon the business and prospects of the Corporation. In such event, the Corporation will seek satisfactory replacements but there can be no guarantee that appropriate personnel may be found.

The Corporation has only limited funds with which to complete a potential Qualifying Transaction. The Qualifying Transaction may be financed in whole, or in part, by the issuance of

additional securities by the Corporation. This may result in further dilution to investors, which dilution may be significant and which may also result in a change of control of the Corporation. Subject to prior Exchange approval, the Corporation may be permitted to loan or advance up to an aggregate of \$250,000 of its proceeds as a refundable deposit to a target business under certain conditions noted in the CPC Policy. There can be no assurance that the Corporation will be able to recover that loan.

Completion of any Qualifying Transaction is subject to a number of conditions, including acceptance by the Exchange and in the case of a non arm's length Qualifying Transaction, majority of minority approval.

Upon public announcement of the proposed Qualifying Transaction, trading in common shares of the Corporation will be halted and will remain so for an indefinite period of time, until certain reviews are conducted, and obligations satisfied. The common shares will be reinstated to trading upon review and acceptance of the Exchange. Reinstatement to trading provides no assurance with respect to the merits of the transaction or the likelihood of the Corporation completing the proposed Qualifying Transaction. Trading of the common shares may be halted at other times for other reasons, including for failure by the Corporation to submit documents to the Exchange in the time periods required.

The Exchange will generally suspend trading of the common shares or delist the Corporation in the event that the Exchange has not issued a Final Exchange Bulletin within 24 months from the date of listing.

Internal Controls Over Financial Reporting

The Chief Executive Officer and Chief Financial Officer of the Company, in accordance with National Instrument 52-109 ("NI 52-109"), have both certified that they have reviewed the most recent interim financial report and this MD&A (the "Interim Filings") of the Company and that, based on their knowledge having exercised reasonable diligence: (a) the Interim Filings do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made with respect to the period covered by the Interim Filings; and (b) the interim financial report together with the other financial information included in the Interim Filings fairly
